SUMMARY

Digital engineering professional with **6 years of experience** in frontend and backend development.

Seeking a Software Engineer position where my frontend and backend skills will contribute to challenging and impactful projects.

EXPERIENCE

Frontend Developer | Next.js developer

NTT DATA

📅 02/2024 - Present 📍 Remote

- Developed and documented reusable modules using the latest version of Next.js, following best practices for scalability and maintainability.
- Tested modules with Jest, achieving full unit test coverage to ensure code reliability.
- Built reusable Web Components using Stencil.js.
- Collaborated with back-end team to define API strategies.
- Implemented robust error handling mechanisms.

Frontend Developer | Angular Developer

Blue People MX

📅 08/2021 - 02/2024 📍 Remote

- Contributed to the development and implementation of new features for the Track & Trace module using Angular.
- Improved performance and responsiveness by implementing table pagination, **reducing load times** when accessing outstanding invoices.
- Developed payment systems using Angular to enhance the UX across web and mobile.
- Collaborated closely with the back-end team for seamless integrations.
- Deployed new features after validating stability in release sessions with tech leads.
- Participated in pre-deployment reviews to ensure functionality met requirements.

Full Stack Developer

G-Global

📅 2020 - 2021 📍 Mexico

- Built and maintained Warehouse Management System (WMS) modules using React and Node.js, enabling efficient purchase order processing for new clients.
- Ensured timely execution of Pick, Pack, and Ship workflows, supporting the **distribution of over 2,000 SKUs**.
- Established an automated Python-based email scraper to **ingest purchase orders from 4 e-commerce clients**, improving efficiency and reducing manual effort.
- Trained clients and internal teams to ensure smooth system adoption.
- Integrated PostgreSQL database to facilitate the client onboarding process.

Full Stack Developer

ABA Finance

📅 2019 - 2020 📍 Mexico

- Designed, developed, and deployed web applications supporting solar energy initiatives.
- Built robust back-end APIs using PHP, and developed dynamic user interfaces with Angular.
- Deployed solutions on a LAMP stack using shared hosting environments, ensuring scalability and reliability.

Junior Web Developer

DUDE Agency

📅 2019 📍 Mexico

- Managed and executed website maintenance tasks through a structured ticketing system, ensuring optimal performance and client satisfaction.
- Built new WordPress pages, troubleshoot bugs, and implemented updates.
- Frequently worked with Divi and Elementor page builders to deliver responsive web content.

EDUCATION

Bachelor's Degree in Information Communication Technology

UTT | Universidad Tecnológica de Tijuana

📅 2020 📍 Mexico

LANGUAGES

English Proficient | C1

Spanish Native

CERTIFICATION

GitHub Copilot

📅 2025
